CRTPA & CRTPA COUNTY LEP TABLES

Limited English Proficiency Plan (LEPP)

I. INTRODUCTION

What is the CRTPA?

The Capital Region Transportation Planning Agency (CRTPA) is a multi-jurisdictional (4-county) metropolitan planning organization (MPO) mandated by federal and state law to provide continuous, cooperative, and comprehensive transportation planning for the Capital Region. As such, the CRTPA is responsible for the regional transportation planning that guides the future growth and development of Gadsden, Jefferson, Leon, and Wakulla counties.

The CRTPA Board is composed of elected officials who meet on a regular basis to provide direction and make decisions needed to implement transportation projects and strategies. The CRTPA works with its planning and transportation agency partners in Gadsden, Jefferson, Leon, and Wakulla counties, as well as the Florida Department of Transportation (FDOT), CRTPA committees, staff, and the public to:

- Identify and evaluate transportation needs in the region;
- Determine the types of studies, strategies, and improvements needed; and
- Develop short- and long-term programs and plans that include schedules, improvement needs, and funding sources.

Through the public involvement and planning process, the CRTPA guides how federal and state dollars are spent on existing and future transportation projects and programs in the region. The Limited English Proficiency (LEP) Plan is an important component of the public involvement and planning processes, as it provides the blueprint for how individuals with limited proficiency in the English language can have meaningful access to the transportation planning processes.

II. Background On Limited English Proficiency

What is Limited English Proficiency?

Limited English Proficiency (LEP) relates to how well a person can read, write, speak, or otherwise communicate in and understand English. Within the CRTPA region, there are small pockets of individuals who, according to Census data, are identifiable as being language isolated, or not proficient in the English language. This is important information to know because these populations will need special planning consideration to ensure that the language barrier does not prevent them from engaging in the transportation planning process.

How do you identify LEP populations?

CRTPA staff utilizes the Census data as a primary source for identifying the type, number, and approximate geographical location of LEP persons that reside in the CRTPA area. The U.S. Census Bureau does not define populations as, “Limited English Proficient”, but it does report data by Census Tract as to how well people in the region speak English. CRTPA staff utilizes Population Data Tables, “Language Spoken At Home By Ability To Speak English for the Population 5 Years and Over” to establish the estimated LEP population in the CRTPA Region. Evaluation of the Census data helps CRTPA staff anticipate what type and where the LEP populations may exist so that public involvement activities can be planned for a successful encounter if it happens.

What is a Limited English Proficiency Plan and why must the CRTPA have one?

Public participation is one of the most important things that the CRTPA does, and as such, the CRTPA wants to make every effort to hear as many voices as it can. The CRTPA believes that the best transportation decisions consider the needs of the entire community and recognizes that the inability to speak English proficiently can create a barrier to participation in or access to the organization’s programs, services and activities. The Limited English Proficiency Plan (LEPP) is a document that outlines the measures that the CRTPA will take to bridge the gap and provide individuals with limited proficiency in English meaningful access to the transportation planning process.

The LEP Plan addresses Title VI of the Civil Rights Act of 1964, which prohibits discrimination based on race, color, or national origin. In 1974, the U.S. Supreme Court affirmed that the failure to ensure a meaningful opportunity for national origin minorities, with Limited English Proficiency, to participate in a federally funded program violates Title VI (Federal Aid Recipient Programs and Activities) regulations. In other words, Title VI protects the rights of individuals who can not communicate well in English from being excluded in federally funded programs. The CRTPA participates in federally funded programs, and as such, must comply with all aspects of Title VI.

Under the LEP Plan, LEP persons are provided an equal opportunity to services, information, or to benefit from those services and/or information that are provided in English or to English-speaking populations. The LEP Plan directs the CRTPA to provide services and information that is consistent with the fundamental mission of the organization, but does not intend for the provisions therein to be inordinately burdening to the organization.

III. Building the Limited English Proficiency Plan

Factors Used to Frame the Plan

The CRTPA determines the manner in which it will provide participatory assistance and information to LEP individuals using a cumulative analysis of the following four (4) factors:

Factor 1: The number or proportion of LEP persons eligible to be served or likely to be encountered by CRTPA programs, services, or activities.

Factor 2: The frequency with which LEP individuals come in contact with these programs, services, or activities.

Factor 3: The nature and importance of the program, service, or activity to people's lives.

Factor 4: The resources available and the overall cost to the CRTPA.

Factor Evaluation Updates

The factors used to build the LEPP are time sensitive. Responses to any of the four (4) factors can change at any given time as each factor is an assessment of a snapshot in time, both of the population of the CRTPA and of the organization itself. Because things can change so quickly, the LEPP is subject to change quickly as well.

CRTPA staff reviews Census data with every long range transportation plan update, and more frequently if major public involvement projects are on the horizon prior to the next long range transportation plan update and new Census data is readily available. Additionally, CRTPA local governments and advisory committees may alert staff of changes in the population demographics by personal observation. The CRTPA strives to have the most responsive public involvement plan for the CRTPA community. Therefore, the factors building the LEPP will be reviewed on an as-needed basis, and no less frequently than every long range transportation plan update and update to the Census data.

III. CRTPA Area Analysis For LEP

The following pages include an analysis of the CRTPA area pursuant to the four (4) factors identified earlier for building a LEPP. The CRTPA does not intend that the four (4) factor analysis should prevent meaningful access to participation or its documents. Anyone in need of assistance or accommodation in reviewing organization documents may contact the CRTPA Title VI Officer at 850-891-6800.

FACTOR 1: The number/ proportion of LEP persons eligible to be served/ likely to be encountered by CRTPA programs, services, or activities.

Analysis of Type of Contact: The CRTPA conducts regular Board meetings and advisory committee meetings throughout the year. Additionally there will be public hearings and outreach programs conducted. Although the CRTPA Board meetings and advisory committee meetings are open to the public, the primary sources of contact with citizens is through the webpage and through community outreach and education events. Therefore, it stands to reason that *the most likely encounter avenue with LEP individuals would be through education and outreach events in the community, and on the CRTPA webpage.*

Analysis of Number of LEP Persons likely to be Encountered: Data from Table B16001: Language Spoken At Home By Ability to Speak English for the Populations 5 Years and Over, from the U.S. Census Bureau 2006-2010 American Community Survey 5-Year Estimates, was gathered for each CRTPA county.

The results of the Census analysis revealed the following for the CRTPA Region:

Area	Percentage of Population that is LEP	Predominant LEP Language, & its Percentage of the Total Population for the County or Region
Leon County	2.48%	Spanish/ Spanish Creole , 1.27% of Leon County populations, and Over 50% of the LEP Population.
Gadsden County	4.45%	Spanish/ Spanish Creole , 4.15% of Gadsden County Population, and Over 93% of the LEP Population.
Jefferson County	3.06%	Hindi , 1.5% of Jefferson County Population, and over 48% of the LEP Population.
Wakulla County	0.83%	Spanish/ Spanish Creole , 0.48% of Wakulla County Populations, and over 57% of the LEP Population.
CRTPA Region	2.62%	Spanish/Spanish Creole , 1.53% of CRTPA Population, and over 58% of the LEP Population

The predominant LEP language in the region is Spanish/Spanish Creole. This LEP population makes up only 1.53% of the total population of the CRTPA area. The second highest LEP population in the CRTPA region is Chinese, which accounts for just .20% of the CRTPA population.

Results from Factor 1 Analysis: *Based on this information, it would seem reasonable to assume that, after English, the language the CRTPA is most likely to encounter is Spanish, and that it is most likely to be encountered in Gadsden County. The most likely encounter avenue with LEP individuals would be through education and outreach events in Gadsden County, and on the CRTPA webpage.*

FACTOR 2: The frequency with which LEP individuals come in contact with these programs, services, or activities.

Analysis of Frequency: The population analysis conducted for Factor 1 revealed that each county within the CRTPA has a different mix of LEP populations, but the most likely language to encounter is Spanish. The size of this population is relatively small, however, and to date, no request for language assistance services has been made by LEP persons.

Results from Factor2 Analysis: *Based on this information, it is likely very infrequently that CRTPA staff will come in contact with LEP populations.*

FACTOR 3: The nature and importance of the program, service, or activity to people's lives.

Analysis of Importance: The CRTPA uses federal funds to plan for future transportation improvements and projects, including public involvement, education, and outreach endeavors. Although the work of the CRTPA is important to the community, it does not provide critical, emergency, or life-sustaining services to the community.

The CRTPA does program and provide services that affect the entire population of the CRTPA at some point, including the underserved and underrepresented populations. Title VI and Environmental Justice require that the impacts and benefits to these populations be considered in all actions of investment.

Results from Factor 3 Analysis: *The primary projects/documents that the CRTPA undertakes that would be of the most importance for the Title VI populations to understand and have access to their content are :*

- *The Unified Planning Work Program*
- *The Transportation Improvement Program*
- *The Long Range Transportation Plan*
- *The Transportation Disadvantaged Program*
- *Ongoing Corridor Studies and Master Plans*

Therefore, the CRTPA will place emphasis on language assistance for educational materials and public input related to the five (5) major projects/documents above.

FACTOR 4: The resources available and the overall cost to the CRTPA

Analysis of Resources and Costs: Given the size of the LEP population in the CRTPA area and current financial constraints, full-language translations of complete transportation documents is not considered cost-effective. The CRTPA does have local government partners that have foreign language skills that they have offered to the CRTPA. Additionally, translation services, if needed, could be secured from the General Consultant on contract with the CRTPA. General safety materials in Spanish are available from the Florida Department of Transportation.

Results of Factor 4 Analysis: *Due to the small percentage of LEP population that is expected to be encountered and the high cost of translating document into a foreign language, the CRTPA will continue to provide Google Translate on the webpage for the LEP population to convert their own documents into a language they understand. Additionally, the CRTPA plans to continue the practice of having “on-call” translators available to convey information verbally as practical. For educational outreach endeavors, the CRTPA will continue to order outreach tools and brochures from the Florida Department of Transportation in Spanish for use in our community outreach endeavors such as coloring books, posters, etc. for roadway safety lessons.*

IV. Methods To Communicate With LEP Individuals

Face-to-Face Language Barrier

The CRTPA staff will utilize language identification sheets to break the initial barrier of language isolation from the transportation planning process. These language identification sheets have the phrase, "Mark this box if you read or speak {name of language} translated into 38 different languages. The Language Identification Cards were downloaded for free at <http://www.lep.gov/ISpeakCards2004.pdf> and were developed by the US Census Bureau.

The Language Identification Sheets will be available at public meetings, regular CRTPA and CRTPA advisory committee meetings, and at the CRTPA office. A list of CRTPA staff and associated individuals who speak and or write a language other than English and who are willing and able to act as interpreters has been identified for the CRTPA and can be called upon to assist at any encounter with a LEP individual. If a verbal translator is not available at the meeting, then the LEP individual will be directed to list their name and contact information so that we may get back with them via e-mail or phone call with a translator.

Oral Interpretation

The CRTPA will utilize bilingual staff to provide LEP services in Spanish, the most prevalent language in the CRTPA area. Further, CRTPA will reach out to its government partners and general consultant staff in an attempt to secure proficient oral interpretation. The organization maintains a list of its LEP service partners and regularly updates the list to add new resources and languages. If CRTPA is unable to provide meaningful access using these sources, it will utilize professional translation services.

Written Translation

The CRTPA follows US Department of Justice and US Department of Transportation guidelines in providing translation of its documents into languages other than English. Using data collected from the Census, environmental screening tools, past public involvement efforts, and its advisory committees, the CRTPA will assess each of its documents in light of the four (4) factors listed previously and repeated below:

1. The number or proportion of LEP persons in the organization's service area.
2. The frequency with which the organization encounters LEP individuals.
3. The nature and importance of the program, service or activity in question.
4. The resources available to the organization.

To ensure appropriate and competent translation, CRTPA will utilize professional translation services, persons personally known to the CRTPA who are fluent in the requested language, or general consultant services.

As mentioned previously, the CRTPA has installed a Google Translate program <http://translate.google.com> in the website allowing users to view HTML contents in other languages. It is understood that this is not a perfect system, but it should provide enough information for a potential LEP individual or group to make contact with the CRTPA should they have questions or comments.

Notification of Assistance to LEP Persons

It is important to notify LEP persons of services that are available free of charge in a language the LEP persons would understand. The CRTPA will include the following language in English and in Spanish (where appropriate) on meeting notification and other informational materials.

“Public Participation is solicited without regard to race, color, national origin, age, sex, religion, disability, or family status. Persons who require special accommodations under the Americans With Disabilities Act, or persons who require translation services (free of charge) should contact the CRTPA at 850-891-6801 or lynn.barr@talgov.com at least seven days prior to the meeting. If hearing impaired, telephone 1-800-273-7545 (TDD).”

“La participación del público es solicitado sin importar la raza, el estado de color, origen nacional, edad, sexo, religión, discapacidad, o de la familia. Las personas que requieran acomodaciones especiales bajo el Americans with Disabilities Act, o personas que requieren servicios de traducción (libre de cargo) deben comunicarse con el 850-891-6801 o en el CRTPA lynn.barr@talgov.com al menos siete días antes de la reunión. Si problemas de audición, teléfono 1-800-273-7545 (TDD).”

Contact Information

CRTPA is open to new opportunities and ways of reaching LEP populations, including using foreign language publications in the area, and foreign language ads in English speaking or print media if practical. Anyone wishing to volunteer language services or suggest methods of LEP outreach should contact the CRTPA at 850-891-6800.

Anyone who seeks language services should contact the CRTPA’s Public Involvement/Title VI Coordinator:

Lynn Barr
Phone: 850-891-6801
Fax: 850-891-6832
Email: lynn.barr@talgov.com

APPENDIX

LEP TABLES

CRTPA AREA & CRTPA COUNTIES

CRTPA AREA
