

The following Tallahassee residents oppose the Capital Region Transportation Planning Agency's McCord Park/Trescott Ditch option of the Thomasville Road Multi-Use Path linking Midtown and Market.

McCord Park is a passive neighborhood park used by parents strolling with their children, walkers, joggers, leisure cyclists, dog walkers, bird watchers, people relaxing with friends, etc. A two-way "pass-through" trail with faster-moving cyclists, rollerbladers, electric scooterists, etc., occupying the same path as current McCord Park users is unsafe. A multi-use two-way trail is incompatible with the passive nature of McCord Park, which we request to be maintained in its current design, function and manner of use.

For these reasons, we believe the McCord Park/Trescott Ditch option should be removed from consideration.

Hello Commissioner Richardson,

I'm writing you to advocate for the proposed multi use path on Thomasville Rd. I live and work on opposite ends of the path and use it to commute by bike most days. I feel that the Capital Region Transportation Planning Agency has good ideas for bettering the road for pedestrians, cyclists and vehicles.

There are some particularly bad sections of sidewalk on the west side of Thomasville near Gardenia Dr. and I would encourage you to check them out. This is also where the bike lane inexplicably ends.

Thank you for your consideration.

Jeff McClain

Hello Commissioner Matlow,

I'm writing you to advocate for the proposed multi use path on Thomasville Rd. I live and work on opposite ends of the path and use it to commute by bike most days. I feel that the Capital Region Transportation Planning Agency has good ideas for bettering the road for pedestrians, cyclists and vehicles.

There are some particularly bad sections of sidewalk on the west side of Thomasville near Gardenia Dr. and I would encourage you to check them out. This is also where the bike lane inexplicably ends.

Thank you for your consideration.
