AGENDA ITEM 6 D

THOMASVILLE ROAD MULTI-USE PATH FEASIBILITY STUDY KICKOFF

STATEMENT OF ISSUE

This item is being presented to kick-off the Thomasville Road Multiuse Path Feasibility Study.

BACKGROUND

At the November 19, 2019 CRTPA Board meeting, members accepted the Tallahassee-Leon County Bicycle and Pedestrian Master Plan (BPMP). The top ranked major project in the BPMP is the Thomasville Road Multiuse Path, which, in addition to the BPMP is in the Tallahassee-Leon County Greenways Master Plan (implemented by Blueprint). The CRTPA has provided the funding (\$150,000) for this study to be completed by Kimley- Horn and Associates (KHA) under a General Planning Consultant contract.

KHA will provide a brief presentation to kick-off the project and provide the Board an outline of the project, the timeline and schedule for completion, and answer any questions that the Board has regarding the project. The project will be coordinated with the BPMP Working Group (City of Tallahassee and Leon County staff) for input and coordination.
