The Trail is needed and I'm sure it will be utilized after once it's completed.

It Doesn't interfer with Bus Routes for students on old Bainbridge Rd.

We want to hear from you. Comments

This is not an improvement. The hard-packed dirt trail that exists now is a great multi-use trail for mountain bikes, joggers, dog walkers & equestrians. This proposal gives a narrow dirt path for equestrians & mountain bikers. It's not wide enough to ride side by side to talk to a companion. It will be single-file riding and when the trail isn't wide enough, the dirt trail will be eliminated. I don't shoe my horse and need an all-dirt trail, like all my companions. This is expensive and unnecessary and has left out equestrians & mountain bikers. It's a waste of money.

Thanks for listening to equestrians and providing changes to the design of the Orchard Pond Greenway so we will be able to continue riding it. We understand the width limitations and appreciate the consideration given to keep equestrians safe. I would be honored to assist you as this project moves forward on behalf of Southern Trailriders.

Encouraged to see yall listened to equestrians. We would like to see the paved trail only 8 feet wide where there is equestrian use.

Please keep the equestrian parking large enough to accomodate the large rigs. And give us a designated area.

In the name of STA (Southern Trailriders Assoc.) we would like to thank the CRTPA project team members for hearing us equestrians that came to the first public alternatives meeting and adding an equestrian path to the proposed improvements of the Orchard Pond Greenway. We understand that width limitations will not allow a 4ft equestrian path along the entire Greenway. But we appreciate that the original canopy of the Orchard Pond Greenway will not be altered which provides much needed shade on hot summer days.

I'm excited about this project. My only critque is pertaining to the Parkway crossing options. I feel that the offset from intersection option is probably less safe for cyclists because it will be harder to see when cars are coming around corners. That will definitely require a stop sign for trail users if that is the selected option.

Regarding the bridge crossing; the Alternative 1 makes the most sense considering we do not know when FDOT will schedule replacement but if there is any way that the cantilever bridge could be wider than 5', that would be a safer and more plesant experience for pedestrians & cyclists. A 5' pathway with a railing is a tight space.

Thank you for improving the materials to include equestrians. It shows that you are listening & that is greatly appreciated.
The improvements to include the equestrian trail, where unconstrained, is a positive development. However, even stronger efforts must be made to limit the paved trail to 8' throughout, thereby lessening overall impacts to this heritage pathway.

Would prefer the whole asphalt trail to be 8' wide to give horses more room.

Concerned about parking lot getting too busy for horse trailers when more people use it.

Thanks for not kicking us off the Trail.

Please do NOT put any Rock on the equestrian dirt trail.

Alt 1, Alt B

Great project. Support moving forward. As a cyclist I support a wider the eight foot sections where necessary. All users can share the new trails.

Support Alternative 1 on the bridge, lower cost cattle makes sense.

Support Alternative B as a safer approach. design.

I support the recommended alternatives & look forward to riding/hiking on the trail. I also like connections planned with other trails & facilities (Forest Meadows) in Tallahassee/Leon County.

This will be a great option for biking to Havana!
